BUFFERS

WHAT THEY ARE
Professional-quality nail buffers.

WHAT THEY DO
Reduce scratches and create shine on enhancements and natural nails.

WHY YOU NEED THEM
Essential tools needed throughout natural nail and nail enhancement services.

BUFFERS
A. Koala Buffer™
240/1200 grit gray and black buffer. 240 grit refines new and rebalanced enhancements. Perfect to remove shine from the natural nail in P.R.E.P. and to shape natural nails. 1200 grit smooths new and rebalanced enhancements and natural nails. Soft padded abrasive conforms to the nail, eliminating flat spots and providing comfort for the user.

B. Girlfriend Buffer™
2400/4000/12000 grit extra-thick padded buffer. 2400 grit reduces scratches in enhancements and natural nails. 4000 grit creates low shine on enhancements and natural nails. 12000 grit creates high shine.

C. Glossing Buffer
4000 grit/slick shining surface, padded foam buffer. 4000 grit creates low shine on enhancements and natural nails. The slick shining surface produces a glossy, wet-looking finish on enhancements and natural nails.

D. Glossing Block
A 4000 grit/slick shining surface, block buffer. 4000 grit creates low shine on enhancements and natural nails. The slick shining surface produces a glossy, wet-looking finish on enhancements and natural nails. Four sides last twice as long.

DIRECTIONS FOR USE
- Use 2400 grit and higher, gradually increasing grit size to bring the nail to a high shine.

To clean:
- Scrub with a firm brush and soapy water to remove all visible debris.
- Submerge in approved disinfectant according to disinfectant manufacturer's instructions. (Glossing Block and Glossing Buffer cannot be disinfected.)
- Thoroughly dry before using on another client.
- Store in a properly labeled container.

CND offers comprehensive education opportunities. Check the education section of cnd.com for a course near you.

CREATIVE SUGGESTIONS
- Use buffers from lowest to highest grit size for most lustrous and lasting results.
- Wipe off nail between grit sizes for faster shine.
- Use a light touch on the natural nail with the Glossing Buffer and the Glossing Block for optimum results.
- For best results, we recommend wiping away all oil from the nail before using the Girlfriend Buffer, Glossing Buffer and Glossing Block.
